

# Informe

1. [view.py](#) llama a [service.py](#)
2. [service.py](#) llama a a la api con [transport.py](#)

```
11 +     raw_images = transport.getAllImages()  
12 +  
13 +     cards = []  
14 +  
15 +     for raw in raw_images:  
16 +         card = translator.fromRequestIntoCard(raw)  
17 +  
18 +         cards.append(card)  
19 +  
20 +     return cards  
21 +
```

3. [transport.py](#) llama a [traslator.py](#)
4. [traslator.py](#) convierte a las variables de la api y los convierte en tarjeta

## Problemas:

- Connection error : no se puede conectar a la api

### ConnectionError at /home/
